

AutoPan (EU), (UK), (US), (AU)

SKU	SH03060030
EAN	8055687020713
UPC	816892020053

OVERVIEW

Introduced recently at the **NAB Show, IBC** and **Photokina**, AutoPan has obtained a massive positive response. Designed and made in Italy, it is the perfect tool to add great cinematic effects to your productions.

A revolutionary Electronic Tool designed to be Universal. You can install AutoPan on any slider in the market, regardless the brand and length, manual or motorized. It has got an internal motor and a rechargeable battery that pan your camera in several different modes synchronized with the movement of your device.

HOW IT WORKS

Fully programmable: you have only to set-up the keyframes along the route and the internal CPU will do the rest.

It does not require specific measurement calibration nor a fixed distance from the subject.

5 DIFFERENT MODES

TARGETING

Keep the focus onto the subject during the full tracking shot. It's perfect for interviews, talking heads and macro shots.

PANORAMA

Empathize the location due to its absolute perfect 360° shots.

ASYNCR

Be free to pan your camera exactly in the point you like

SPIN

Boost your creativity with an unique movement never seen before.

MULTI-KEYFRAME

Set over 10 different Key-Frame in way design any creative shot
