

UNIVERSAL TILT HI HAT

SKU	SH81040005
EAN	8055687020669
UPC	816892020343

OVERVIEW

ShooTools Universal Tilt Hi Hat is the newest revolutionary must have for filmmakers to maximize shooting, solving quickly the annoyance of mounting half ball heads on Sliders or Dolly with 3/8" thread.

Born Universal. Tilt Hi Hat is designed to suit every video head of 75mm and 100mm, simply installing the included ring adapter, toolless. ShooTools aims to offer always smart solutions and for this reason, Tilt Hi Hat includes 2 Locking Handles of 3/8" and M10 for a quick video head set up, valid for any branded video head available in the market (Cartoni, Manfrotto, Miller, Sachtler, etc.).

180° rotation capacity. The easiest and most practical "upside down" shootings can be realized so easily! No effort is required to obtain unique points of view like table tops or vertical tracking shots. Everything works really smoothly at the desired angle.

Safety and Steadiness. The two valuable locking handles of 3/8" & M10 facilitate the head fixing in any desired position, while a dual blockage system guarantees maximum safety and steadiness.

Born to suit filmmakers needs. It doesn't matter the location of filming nor the tool: Tilt Hi Hat is extremely adaptable. As a matter of fact, one of the characteristics of Tilt Hi Hat base is the existence of multiple holes all around it. The holes facilitate the installation of this exceptional device on a wooden board or on any other tool or surface. Moreover, several 3/8" and 1/4" threaded holes on the base sides offer the possibility to add accessories or tie downs. Or.. why don't set it to the top of a crane!? It could be a lifesaver.

Lifetime device. Completely Drilled in Italy from high-quality 6066 Aluminum, Shootools Tilt Hi Hat is finished with a double treatment of shot peening, to increase hardness, and anodization at 30 microns, to increase the tools protection against usage, time and weather conditions.

HIGHLIGHTS

- 100% Made in Italy
- Unique 180° Rotation
- Universal for 75mm 100mm heads
- 3/8" Knob Included
- M10 Knob Included
- Billet Anticorodal Comports
- Professional Tool
- Double System of Blockage
- Lateral 3/8" - 1/4" holes
